### **OSOBINE LIČNOSTI STUDENATA UČITELJSKOG FAKULTETA I STUDENATA PSIHOLOGIJE**

U radu su utvrđene razlike između studenata učiteljskog fakulteta i studenata psihologije na dimenzijama i specifičnim crtama ličnosti u okviru inventara NEO-PI-R primenom kanoničke diskriminativne analize. Rezultati govore o postojanju globalne razlike između posmatranih studijskih grupa, uzimajući istovremeno u obzir sve dimenzije ličnosti iz NEO-PI-R koje konstituišu funkciju. Najveća razlika utvrđena je na dimenziji OTVORENOST. U završnoj diskusiji razmatrana je saglasnost utvrđenih dimenzija ličnosti studenata učiteljskog fakulteta sa zahtevima savremenog obrazovnog procesa.

**Ključne reči:** inventar ličnosti NEO-PI-R, studijske grupe, kanonička diskriminativna analiza

### **PERSONALITY TRAITS OF STUDENTS OF THE TEACHER TRAINING COLLEGE AND STUDENTS OF PSYCHOLOGY**

In this paper we examined differences between students of teacher training college and students of psychology on personality traits as defined by the Big Five personality model operationalized by NEO-PI-R inventory. The data was processed by using canonical discrimination analysis. The results show the existence of a global difference between the observed study groups, considering at the same time all dimensions of personality from NEO-PI-R which constitute the function. The main difference was found on dimension of OPENNESS. Accordance of determined dimensions of personality of students of the teacher training college with demands of contemporary educational process was considered in the final discussion.

**Keywords:** the inventory of personality NEO-PI-R, student groups, canonic discriminative analysis
